

Avizia

Tactical

HD video communication - even in the toughest environments.

Rugged & Lightweight Video Endpoint

With its briefcase-style factor form, the Avizia Tactical is a lightweight, rugged, weather and impact resistant videoconferencing unit designed to endure the elements. The Tactical is ideal for military communications, emergency response, and other situations where face-to-face collaboration is critical from even the harshest environments.

Common Uses:

Military & Defense

Emergency Response

Mining & Drilling

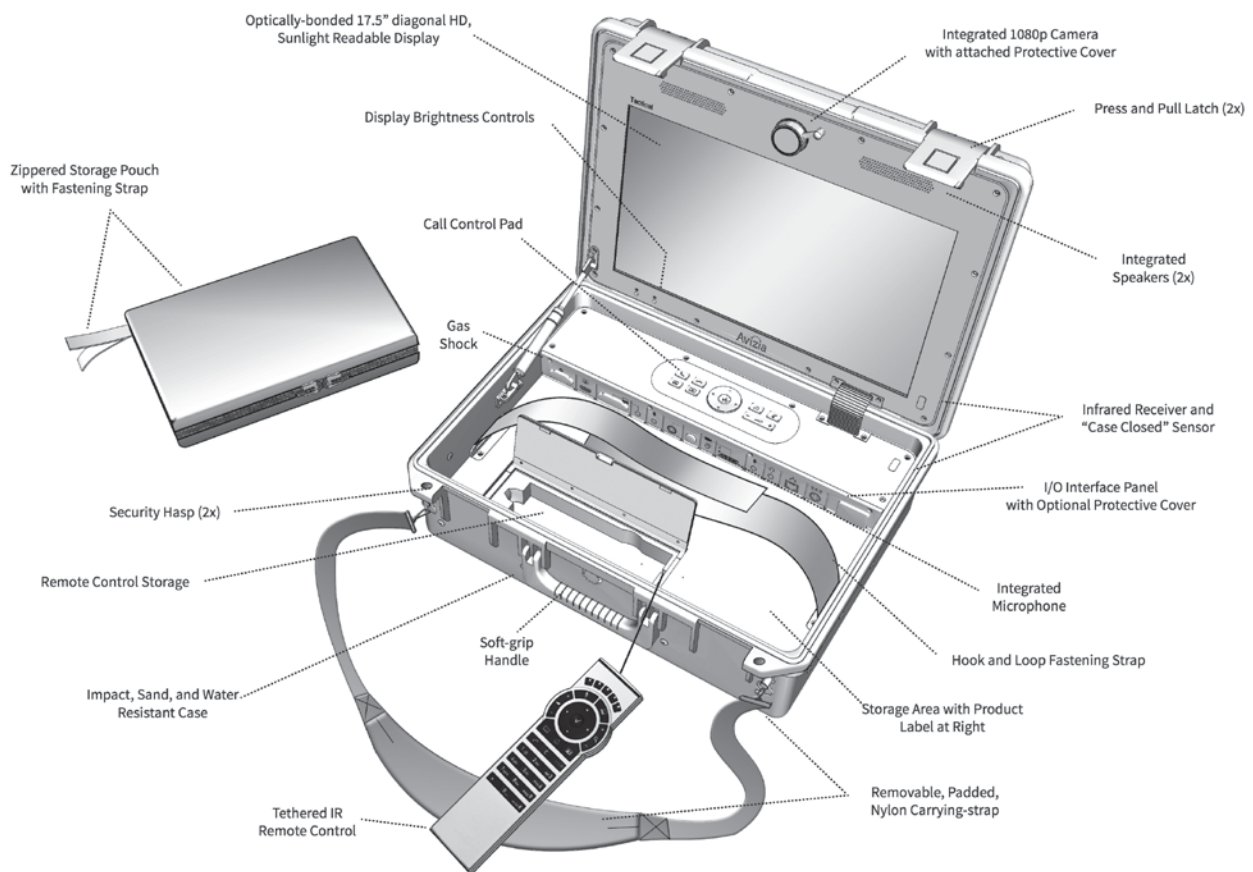

Construction & Demolition

Features & Benefits:

- **Durability** – Water, sand, impact, chemical and corrosion-resistant case offers extreme protection with portability.
- **Visibility** – A 17.5” glare-resistant and optically-bonded screen with brightness controls maximize readability in sunlight.
- **Easy-to-Use** – A control panel simplifies use and includes an infrared remote for full system operation.
- **Video** – An embedded 1080p camera and Cisco TelePresence SX20 codec enable high definition video and content sharing.
- **Audio** – A built-in microphone captures every word while dual 10W speakers are integrated to provide clear audio.
- **Expandable** – Inputs and outputs can connect a secondary microphone, camera, and display to create a portable conference room.
